# ***"Caring for Every Paw, Protecting Every Life"***

## **Your Peace of Mind**

We provide comprehensive veterinary care to keep your pets healthy, happy, and thriving. From routine health check-ups and vaccinations to specialized nutrition plans, reproductive services, and grooming, our expert team ensures personalized care for every animal. Our preventive and medical services are designed to promote wellness, detect health issues early, and provide compassionate support for your furry companions at every stage of life.

## **Description of All Veterinary Services**

### **1. General Health Check-Ups**

A general health check-up ensures your pet stays healthy and disease-free.

It includes:

- Routine Physical Examination: Complete body check of eyes, ears, skin, teeth, heart, lungs, and joints.
- Vaccination Schedules: Planning and administering vaccines to protect pets from common viruses and infections.
- Health Monitoring: Regular tracking of your pet's overall wellness and early detection of potential issues.
- Growth & Weight Assessment: Ensuring your pet's growth is normal and maintaining ideal body weight.

### **2. Diagnostics & Testing**

Veterinarians perform diagnostic tests to identify underlying health problems accurately.

Includes:

- Blood Tests: Checking for infections, anemia, organ function, and overall health.
- Urine & Stool Tests: Detecting kidney issues, diabetes, parasites, and digestive problems.
- X-rays & Ultrasound: Imaging tools to diagnose fractures, tumors, pregnancy, and internal organ issues.
- Allergy Testing: Finding the cause of skin or food allergies.
- Heartworm Testing: Early detection of heartworm infection for timely treatment.

### **3. Emergency & Critical Care**

Immediate medical attention for life-threatening situations.

Includes:

- Trauma Treatment: Handling injuries from accidents, falls, or fights.
- Poisoning & Toxin Management: Emergency care for ingestion of harmful substances.
- Severe Infection Care: Treatment for high-fever, sepsis, and other critical infections.
- On-Spot Stabilization: Immediate life-saving care (oxygen support, IV fluids, wound control).

### **4. Surgery & Procedures**

Professional surgical care with safety and hygiene.

Includes:

- Spaying & Neutering: Preventing unwanted pregnancy and improving long-term health.
- Soft-Tissue Surgery: Surgeries involving skin, muscles, organs (like tumor removal, hernia repair).
- Orthopedic Surgery: Treatment of bone fractures, joint issues, and ligament injuries.
- Tumor Removal: Safe removal of cancerous or benign growths.
- Wound Stitching & Care: Cleaning, suturing, and dressing of wounds.

### **5. Dental Care**

Oral health is essential for a pet's overall wellness.

Includes:

- Dental Cleaning: Removing plaque and tartar buildup.
- Tooth Extraction: Safe removal of damaged or infected teeth.
- Oral Disease Treatment: Managing gum disease, ulcers, and mouth infections.
- Bad Breath & Plaque Control: Preventive dental care and dietary advice.

## **6. Parasite Control**

Protection from harmful external and internal parasites.

Includes:

- Tick, Flea & Mite Treatment: Eliminating parasites causing itching, hair loss, and infections.
- Deworming: Removal of intestinal worms like roundworms or tapeworms.
- Preventive Medications: Monthly supplements to prevent parasite infestations.

## **7. Skin & Coat Treatment (Dermatology)**

Complete skin and coat health solutions.

Includes:

- Allergy Management: Treating food, seasonal, and environmental allergies.
- Skin Infection Treatment: For bacterial, fungal, or parasitic infections.
- Hair Loss Treatment: Identifying and treating diseases causing shedding.
- Fungal Issues: Managing ringworm, yeast infections, and dermatitis.

## **8. Nutrition & Diet Planning**

Customized diet plans for better health.

Includes:

- Diet Charts: Tailored diet plans based on age, breed, and health.
- Weight Programs: Safe weight gain/loss plans.
- Special Medical Diets: For pets with diabetes, kidney disease, allergies, or obesity.

## **9. Vaccinations & Preventive Care**

Preventive care for long-term health.

Includes:

- Annual Vaccinations: Protection from viral and bacterial diseases.
- Puppy & Kitten Vaccination Programs: Scheduled vaccines for young pets.

**"Caring for your pets like family—because they are."**

- Travel Vaccinations: Health certificates and special vaccines required for travel.
- Disease Prevention Plans: Yearly wellness programs to prevent illness.

## 10. Reproductive Services

Support for breeding and pregnancy care.

Includes:

- Artificial Insemination: Safe and controlled breeding process.
- Pregnancy Diagnosis: Using ultrasound and physical exam to confirm pregnancy.
- Labor & Delivery Support: Assistance during whelping/queening.
- Neonatal Care: Care for newborn puppies or kittens.

## 11. Pet Grooming & Hygiene

Keeping pets clean, fresh, and comfortable.

Includes:

- Bathing: Using pet-safe shampoos for healthy skin and fur.
- Nail Trimming: Preventing overgrown nails and injuries.
- Ear Cleaning: Reducing infections and odor.
- Coat Trimming: Breed-specific grooming and styling.

## 12. Behavioral Consultation

Improving behavior and mental health.

Includes:

- Aggression Control: Managing biting, fighting, and dominance issues.
- Anxiety Treatment: For separation anxiety, noise phobia, and stress.
- Training Advice: House training, obedience training tips.
- Socialization Guidance: Helping pets become friendly and confident.

## 13. Geriatric Pet Care

Special care for senior pets (usually 7+ years).

Includes:

- Senior Health Programs: Regular check-ups for age-related issues.
- Pain Management: Treatment for arthritis, joint issues, and chronic pain.

**"Caring for your pets like family—because they are."**

- Mobility Support: Physiotherapy, supplements, and mobility aids.
- Disease Monitoring: For kidney disease, heart issues, diabetes, etc.

## 14. Exotic Animal Care

(If the clinic handles exotic animals)

Specialized treatment for:

- Birds: Beak trimming, wing clipping, respiratory care.
- Reptiles: Habitat guidance, skin shedding issues, infections.
- Rabbits & Small Mammals: Dental care, digestive issues, wellness check-ups.

## 15. Home Visits (If Provided)

Convenient veterinary care at your doorstep.

Includes:

- General Check-Ups at Home: Routine health examination without clinic visits.
- Home Vaccination: Safe and easy preventive care at home.
- Emergency Home Treatment: Initial treatment for sudden injuries or illness if you cannot travel.
